Environments

Goodies

Conclusion

Summary

Literature

Your system is designed to the target customer environment,
but ...

- you have to have an environment for development and testing,
- customer needs an environment for acceptance tests deploying into production
- customer can have multiple production environments

⇒ It is necessary to have **additional environments**
out of the target one!

Environment kinds

- development
- integration
- testing
- pre-acceptance
- acceptance
- production #1
- production #2
- ...

Development
environment

What it is?

Motivation

Environments

Goodies

Conclusion

Summary

Literature

Environment	Description
Local	Developer's desktop/workstation
Development	Development server aka sandbox
Integration	CI build target, or for side effects testing
Test/QA	For functional, performance testing, Quality Assurance etc.
UAT	User acceptance testing
Stage/Pre-production	Mirror of production environment
Production/Live	Serves end-users/clients

DTAP 1/3

Software
Engineering 2

Dr. Petr
SPACEK
